Portfolio ⋄ GitHub ⋄ LinkedIn

Summary Goal-oriented engineer with proven ability to leverage data knowledge to gather insights. I have experience working on teams using Agile Scrum methodology and facilitating cutting-edge engineering solutions.

EDUCATION

University of Massachusetts Dartmouth — September 2011 - May 2016
B.Sc in Mathematics — *North Dartmouth, MA*

University of Denver — September 2019 - March 2021
M.Sc in Software Programming — *Denver, CO*

WORK EXPERIENCE

TeamWorx Security — September 2021 - January 2025
Software Engineer — *Columbia, MD* ***(Remote)***

- Automated ETL workflows to ingest, clean, and normalize diverse security log sources (firewall, IDS/IPS, endpoint, cloud).
- Performed root cause analysis of security incidents using statistical and ML-driven forensic techniques.
- Utilized AI to generate summary reports for malicious files. This includes:
  -Prompt Engineering for strategies to allow users to communicate with an LLM for file analysis
  -Working with stakeholders throughout the organization to identify how to leverage AI to drive cybersecurity solutions
- Manage permissions to secure classified data
- Developed and maintained comprehensive end-to-end (E2E) test suites using Playwright

CarSwoop — August 2019 - October 2019
Junior Software Engineer — *Santa Monica, CA*

- Build upon an application and web platform using React for the frontend and Node Js/firebase for the backend. such as CSS, Jquery, Bootstrap, and HTML
- Leveraged collaboration tools to enhance team communication and project management, resulting in improved productivity.
- Utilized MapKit JS to display mapping in real-time for the location of drivers in the system.

PROJECTS

PyTorch CNN — https://github.com/dayo-oguns/Pytorch-CNN/

This repository showcases my skills in developing convolutional neural network. With numpy, pandas, scikit learn and a training dataset, I manipulated and gathered solutions and results.

Neural Network — https://github.com/dayo-oguns/PyTorch-NeuralNetwork

Designed and implemented a neural network model to analyze and visualize the iris data set.

COMPETENCIES

Languages: Python, TypeScript, NextJS, NodeJs, C#, Ruby on Rails, LaTex, SQL, Java
Software: PostgreSQL, MongoDB, Tanstack, Zuckstand, Playwright, MySQL, Jest, Pub-Sub, Docker
Additional: AWS S3, AWS Lambda, React Native, Tailwind, MaterialUI, HTML5, CSS, WordPress, React
