Summary Goal-oriented Software Development Engineer with 4+ years of experience developing scalable full-stack applications across the cybersecurity sector and enterprise technology environments. I have a strong background in system design, performance optimization, and cross-functional software delivery.

WORK EXPERIENCE

Mercor July 2026 - Present
Software Engineer *Remote*

- Design and execute structured technical benchmarks to evaluate complex software solutions, algorithmic efficiency, and system reliability.
- Conduct rigorous code reviews across diverse stack implementations (Node.js, Python, TypeScript) to validate performance, security protocols, and architectural best practices.

Recruitifi February 2026 - April 2026
Senior Software Engineer *Remote*

- Developed and maintained full-stack recruiting platform features using React, Ruby on Rails, and PostgreSQL, delivering scalable, user-focused solutions for human resources.
- Engineered high-throughput backend APIs with Ruby on Rails, optimizing database queries and data serialization to reduce endpoint latency.

Overnght May 2025 - August 2025
Senior Software Engineer *Remote*

- Led the design and development of scalable features for a collegiate streaming platform using React, FFmpeg, AWS, Express.js and PostgreSQL.
- Architected and implemented full-stack solutions by collaborating with cross-functional teams, building reusable React components, designing efficient PostgreSQL schemas, and ensuring reliable, secure, and maintainable software that supported Overnght streaming workflows.

TeamWorx Security September 2021 - January 2025
Software Engineer *Columbia, MD Remote*

- Collaborated with the engineering team, product, design, and QA to identify system vulnerabilities, refine security workflows, and construct an incident response mechanism.
- Worked with UI/UX design team to translate detailed mocks in Figma into pixelated React web pages and React Native mobile screens.
- Designed and maintained RBAC policies and access permissions for classified data.

TECHNICAL SKILLS

Languages:	Python, TypeScript, JavaScript, C#, Ruby, SQL
Frameworks:	React, Next.js, React Native, Node.js, Express, ASP.NET Core, Django, Ruby on Rails
Infrastructure:	AWS, PostgreSQL, MongoDB, MySQL, Apache Kafka, Docker, Git
Testing & UI:	Jest, Cypress, Playwright, Tailwind CSS, Material-UI, TanStack Query, Zustand

EDUCATION

University of Massachusetts Dartmouth – B.Sc. in Mathematics 2011–2016
